

An aerial photograph of a river, likely the Wupper, showing a large, irregularly shaped area of brownish sediment suspended in the water. The sediment plume is concentrated in the center-right of the frame, extending from the top right towards the bottom center. The surrounding water is dark blue-grey, and the banks are covered in dense green forest. The text is overlaid on the image.

- Hypothesen prüfen

Konzeptionelle Voruntersuchung

An aerial photograph showing a wide river with a large dam structure in the center. A highway bridge crosses the river to the right, with several vehicles visible. The water is a mix of dark and light brown, indicating sediment. The surrounding landscape includes green trees on the left bank and some industrial or construction areas on the right.
